

DISTRIBUTION CONSTRUCTION & MAINTENANCE

American Current is an electrical utility construction company built and led by veterans of the investor-owned utility and contractor side of the business. We deliver safe, code-compliant overhead and underground distribution construction and maintenance for investor-owned utilities, cooperatives, and municipalities. Our crews are qualified to perform line work up to 35 kV — from new construction and system upgrades to make-ready, equipment changeouts, energized maintenance, and 24/7 storm restoration. We bring a utility owner's mindset to every project: safety, quality work, clear communication, and on-time, on-budget execution.

CORE CAPABILITIES

OVERHEAD CONSTRUCTION <ul style="list-style-type: none"> New line construction Line maintenance/reconduit Distribution Automation Up to 35 kV systems 	UNDERGROUND CONSTRUCTION <ul style="list-style-type: none"> URD subdivisions Trenching, directional boring & daylighting Cable pulling/splicing Pad-mount equipment UG fault location & diagnostics (GPR, arc-reflection, thermal) 	POLE & EQUIPMENT WORK <ul style="list-style-type: none"> Distribution poles Transformers Cutouts & arrestors Reclosers Regulators 	ENERGIZED LINE WORK <ul style="list-style-type: none"> Hot-stick maintenance Rubber glove work Switching & sectionalizing Qualified line crews
SYSTEM UPGRADES <ul style="list-style-type: none"> Voltage conversions Line rebuilds Reliability improvements Storm hardening 	MAKE-READY / JOINT USE <ul style="list-style-type: none"> Telecom attachments Pole loading mitigation Pole replacements Field audits 	MAINTENANCE & TROUBLE <ul style="list-style-type: none"> Routine inspections Preventive maintenance Outage response Distribution OH & UG Crews 	STORM RESPONSE <ul style="list-style-type: none"> 24/7 mobilization Hurricane & ice events Mutual assistance ready Self-sufficient crews

WHY AMERICAN CURRENT?

- Utility-side leadership.** Built by former Alabama Power engineering and operations leaders — Over 125 years of electrical utility leadership experience — who understand what reliable performance looks like from the utility's side of the table.
- Self-perform crews & equipment.** In-house lineworkers, foremen, and a company-owned fleet — no layered subs, no finger-pointing.
- Safety as a core value.** OSHA 1910.269-aligned program with daily JSBs, qualified electrical worker training, and a zero-incident standard.
- Licensed & credentialed.** Alabama and Mississippi Electrical GC licenses active; Florida and Louisiana planned. Alabama Professional Engineer and NASCLA Electrical qualified.
- Storm-ready, nationwide.** Mobilizes 24/7 for hurricane, ice, and major-event restoration anywhere in the continental U.S.

125 YEARS

Combined electrical utility industry experience (IOU + contractor)
